Study Monitor Accommodations at Keck Medical Center Facilities

If required by the study sponsor, external study monitors may resume visits to non-clinical space—e.g., offices—on campus. Only one on-site monitor per study is allowed. Visits must be approved by the Keck Office of Academic Affairs via IntelliCentrics, the registration system for monitors and other personnel entering Keck Medical Center for business purposes. Monitors must view instructions and register in IntelliCentrics prior to the visit.

Monitors and research teams must follow all safety procedures while planning and conducting visits. Research teams must inform monitors at the time of scheduling not to come to the facilities if they experience symptoms concerning for COVID-19. Whenever possible, research teams should screen monitors for symptoms remotely the day prior to visit. While on campus, monitors must practice physical distancing, face covering, and screening as required by the health system.

Note: The Investigational Drug Pharmacy (IDS) can only accommodate two people at one time. Monitors visiting IDS must don hospital-provided Personal Protective Equipment and limit their time in the facility to the extent possible.
